

# POOL SERUM®

## Total Maintenance Application Instructions:

Pool Serum® Works on Above Ground Pools as well as Inground Pools.

- 1) Check your pH and Adjust between 7.4 – 7.8 and total Alkalinity (TA) between 80-120 PPM if necessary.
- 2) Shock or super chlorinate prior to adding Pool SERUM® Total Maintenance. Add 1 LB packet of chlorine or 1 gallon of liquid chlorine for each 6 oz container of Pool SERUM® added. Add Pool Serum through the skimmer monthly for best results. One 6 oz container treats up to 20,000 gallons of water.
- 3) It is highly recommended for sand and DE filters that you run the pool pump for 2 hours after you add Pool SERUM then backwash the filter for 2 minutes to remove the bio-matter that was loosened. Cartridge filters should also be cleaned a few hours after the application of Pool SERUM.
- 4) Run the filter cycle daily to **“super Clarify”** the water, Pool Serum works with all types of filters.
- 5) This product is an extended life clarifier and bio cleaner and is not a substitute for any type of sanitizer.
- 6) **Pool SERUM Is A Preventative Product.** Add the required amount every 30 days during pool season.
- 7) Add one or two jars of Pool SERUM after you have lowered the water level of the pool for winter cover installation. Pool Serum will allow for a much cleaner and clearer pool opening in the spring.

**FIRST AID:** If swallowed in undiluted solution, drink large amounts of water. Do not induce vomiting. Avoid alcohol. In case of accident or illness, seek medical attention immediately.

**GET IT CLEAN.  
KEEP IT CLEAN.**
